

*Traditional Pizza all day any day-twenty-four/seven*

## **Automatic Distributer of Fresh Pizza (Pizza Vending Machine)**

### **Movement Detection:**

Any and all movement of the machine is detected by an industrial type monitor. An electronic card secures this system in place.

### **Power connection and Hooking up:**

- electric power: 220 alternative volts. maximum of five kilowatt
- Includes a standard specific telephone.

### **Contains:**

- 40 Fresh ingredients in a box. Average size is 29 -30 cm (12 inches)
- 6 choices entirely programmable (name of the product, price and stock)

### **Product Storage:**

The pizza are stored in their boxes, inside a refrigerator at +2° C (36°F) at the back of the distributor.

This temperature is regulated & controlled by an electronic card with an integrated security system.

### **Operation:**

An integrated computer inside the vending machine guides the distribution process. The computer is specifically programmed to coordinate all the different functions including (payment, screen display, receipt distribution). The computer also verifies the remaining inventory and confirms that all products conform to their expiration date limitations.

### **Time of Distribution:**

- Less than **four** minutes, pizza is hot.
- In roughly **thirty** seconds, pizza cold.

### **Method of Payment:**

Payment can be made by Bank/ATM card. An automatic payment unit is installed. An electronic card is coordinated with a GIE Bank card. Payments made with a Monéo or a private card will soon be available.

### **Verification by computer:**

A modem connection enables verification of all transactions, remaining the inventory and total sales. These verifications can be made on a PC from home or from the office.

### **Maintenance by computer**

A technical service on your computer allows you to confirm the smooth functioning of the machine with a one year warranty. This is guaranteed from the date of product purchase in order to assist you.
